

RECSM Summer School:

Machine Learning for Social Sciences

Session 1.1:
Course Overview

Reto Wüest

Department of Political Science and International Relations
University of Geneva

Session 1

Session 1

No.	Topic
1.1	Introductions and course overview
1.2	Introduction to machine learning
1.3	Assessing model accuracy
<i>Break</i>	
1.4	Shrinkage methods I: ridge regression
1.5	Shrinkage methods II: the lasso
1.6	Application of ridge regression and the lasso

Session 2

Session 2

No.	Topic
2.1	Introduction to classification and regression trees
2.2	Advantages and disadvantages of trees
2.3	Bagging, random forests
<i>Break</i>	
2.4	Boosting
2.5	Application I: classification and regression trees
2.6	Application II: bagging, random forests, boosting

Session 3

Session 3

No.	Topic
3.1	Introduction to unsupervised learning
3.2	Principal components analysis (PCA)
3.3	K -means clustering
<i>Break</i>	
3.4	Hierarchical clustering
3.5	Application I: PCA
3.6	Application II: clustering methods

General Information

General Information

- Please feel free to stop and ask questions at any time.
- All course materials are available at:
